DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

First and second restriction enzymes, Esp3I and Eco31I;

Fifth and sixth restriction enzymes, Ecp31I and Esp3I.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

First and second restriction enzymes, Esp3I and Eco31I, generic to claim 37;

Fifth and sixth restriction enzymes, Ecp31I and Esp3I, generic to claim 37.

Art Unit: 1637

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: restriction enzymes Esp3I and Eco31I are drawn to unique polypeptides with unique primary structures, that while having similar function, display different enzymatic properties with respect to endonuclease activity and recognition sites; likewise, restriction enzymes Ecp31I and Esp3I are also drawn to unique polypeptides with unique primary structures, that while having similar function, display different enzymatic properties with respect to endonuclease activity and recognition sites.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David C. Thomas whose telephone number is 571-272-3320 and whose fax number is 571-272-3320. The examiner can normally be reached on 5 days, 9-5:30.
